

Production Assistants and Technical Crew Required - Sydney

Contributed by Administrator
Tuesday, 24 November 2009

TAVSA hires audio, lighting and visual equipment to various hotels, nightclubs and events held around Sydney. We also supply equipment to corporate events throughout the week and service venues at these times.

The position available would involve setting up and packing up this equipment at different times through the week and weekend. For more interested and technically minded applicants we have shifts available to monitor this equipment and/or control intelligent lighting at the event. Regular shifts and casual are both available.

A driver's license and driving experience would be beneficial. However, no real experience is necessary as all technical knowledge can be learnt on the job. The only requirements are to be enthusiastic, keen to learn, punctual and responsible. For further information please see www.tavsa.com.au

If you believe you can fill the role please email: employment@tavsa.com.au
